ABOUT

I am a senior software engineer with 4 years of experience. My work extends from system design and analysis to complete implementation, but front-end web development is where my passion truly lies working with React, Vue and Solid.js.

WORK EXPERIENCE

Front-end Web Developer

November 2020 - January 2023

Working full-time for more than two years on this project, I was able to **lead a team** of 3 to 4 front-end developers in the process of creating and maintaining features while setting design system standards for the design team to follow.

Projects:

Calculate

A financial tool for modern SaaS organizations that automatically generates reports on finances, growth metrics, cashflow forecasting, cash management, customer growth and churn, multi-source subscription management and more. Features complex editable tree tables with fixed columns, sticky headers and advanced styles, interactive data rich charts. Collects data from most known major accounting softwares. My biggest responsibility in this project is to create and maintain different libraries in a monorepo for tables, charts and reusable UI components.

ReactTypeScriptMaterial UISassStyled componentsreact-hook-formZodD3HasuraStripe Payment GatewayGraphQLAuth0TurborepoSentry

What I worked on

Front-end Web App

Full-stack Web Developer

May 2020 - November 2020

Working as a full-stack web developer in varying projects using different sets of technologies. I've gained the most experience working here, tackling more challenging problems.

Projects:

BMW Foundation

Built this website from the ground up until it went live, it's an informative website of the foundation's mission, plans and events. The website features advanced accessibility features and multi-language routing.

Website (front-end)

Educational platform:

An educational platform where professors can upload and schedule lectures to different classes, automatically create and share Zoom meeting links after a lecture have been seen by all the students to discuss it, create assignments, quizzes and grade students. We built two mobile apps for Android and iOS, an admin dashboard where professors can manage lectures, send emails with grades to students' parents.

SELF-TAUGHT COURSES

Mastering React (by Mosh Hamedani)
Node.js - The Complete Guide to Build RESTful APIs (by Mosh Hamedani)
Vue - The Complete Guide (w/ Router, Vuex, Composition API) (by Maximilian Schwarzmüller)
CSS - The Complete Guide (by Maximilian Schwarzmüller)
Master C++ and OOP (Learncpp.com)
Introduction to Game Development Specialization (Coursera)

EDUCATION

Computer Science and Automatic Control
Faculty of Engineering - Tanta University
2014 - 2019

GRADUATION PROJECT

An Express-like C++ web application framework

A simple-to-use web development framework with an easy syntax inspired by Express.js that lets developers build full-fledged back-end multi-threaded api servers and connect it to the desired database in C++ that also supports middleware.
