

Dear Hiring Manager at **Nightfall AI**,

I am writing to express my interest in the **Frontend Engineer** role. With 5 years of experience in web development, I am confident that I have the skills and qualifications necessary to excel in this position.

I have a strong background in **React**, **Typescript** and **GraphQL**. I also have experience with mobile-first design, SEO, accessibility and web development fundamentals. On the back end, I have experience with Express.js, Firebase and AWS.

During my time working as a senior front-end web developer for Calqulate, I led a team of four front-end developers reviewing PRs and optimizing **code performance**. I developed front-end monorepo architecture with two apps and five independent libraries including a proprietary charts library using D3.js, tables and reusable UI components. I also developed a proprietary types SDK for API type safety.

I am excited about the opportunity to bring my skills and experience to your company and contribute to the continued success of your web development team. Thank you so much for considering my application.

Please also consider taking a look at [my portfolio](#)

Sincerely,

Ahmed Habeila
