CAREER OBJECTIVE

Highly motivated software engineer with 5 years of professional experience as a web developer and flexibility to work on any stack. Strong understanding of **React, Typescript, HTML/CSS** and web development fundamentals. Excellent interpersonal skills to work with a team and clients. Looking to secure a position in a reputable progressive organization to expand my learnings, knowledge, and skills in web development.

Worked on various projects and dived into a lot of concepts of web development, from content-driven websites focused on accessibility, keyboard navigation and SEO to data-driven web apps with complex forms, data-rich charts and tables, reusable UI components and design systems.

WORK EXPERIENCE

Full-stack Web Developer

January 2023 - Current

Quint

Projects:

Quint: A web 3 platform for the Quint cryptocurrency.

Achievements

- Built the website from the ground up with a team of 4 in 5 days
- Fully accessible, responsive and supports light and dark modes

Technologies used

ReactTypescriptRadix UITailwind CSSNext.jsWeb 3Astro

My responsibilities

Website (front-end)

Full-stack Web Developer

November 2020 - January 2023

Calqulate

Led a team of 5 front-end developers in the process of creating and maintaining features while setting design system standards for the design team to follow. Built and maintained different libraries in a monorepo for tables, charts and reusable UI components.

Projects:

Calqulate: A financial tool for modern SaaS organizations that

- Collects data from multiple sources and automatically generates reports on finances, growth metrics, cashflow forecasting, cash management, customer growth and churn, multi-source subscription management and more.
- Features complex editable tree tables with fixed columns, sticky headers and advanced styles, interactive data rich charts.
- Integrates with most known major accounting and subscription software like Stripe, Procountor, QuickBooks and Xero.

Achievements

- Built a proprietary charts library using D3.js with 10 different types of charts with animations, interactive tooltips, legends and placeholders with randomly generated data'
- Created front-end monorepo architecture, including 2 apps and 5 independent libraries
- Built a library for performant editable tree tables with fixed columns, virtual sticky headers and advanced styles
- Built a responsive app layout with Atlassian-like collapsible drawer and mobile menu
- Built time selectors and filters that follow a global state design pattern and sync with the URL
- Built an integration with Stripe for the users to pay for subscriptions
- Built a proprietary types SDK to ensure API type safety between front-end and back-end

Technologies used

Full-stack Web Developer

May 2020 - November 2020

Coformatique

Worked as a full-stack web developer on varying projects in this warehouse company, using different sets of technologies. Gained experience in accessibility, pixel perfect UI, responsive design and SEO.

Projects:

BMW Foundation: An informative website of the BMW Foundation's mission, plans and events. The website features advanced accessibility features and multi-language routing.

Achievements

- Built this website from the ground up until it went live
- Fully responsive, supports keyboard navigation and screen readers
- Created an accessibility menu which features high contrast mode, dyslexia-friendly font and animations toggle
- Integrated Google Tag Manager along with following the best SEO practices

Technologies used

ReactGatsbyjsTypeScriptMaterial UIJSSMulti-language RoutingResponsive UIi18nextAxiosWordpressTwitter APIInstagram APIFacebook APIYouTube API

Google Tag Manager

My responsibilities

Website (front-end)

TwentyThirty: An online magazine managed by the BMW Foundation inspiring a just and sustainable future in alignment with the UN 2030 Agenda.

Achievements

- Built this website from the ground up until it went live
- Fully responsive, supports keyboard navigation and screen readers
- Integrated Google Tag Manager along with following the best SEO practices

Technologies used

ReactGatsbyjsTypeScriptMaterial UIResponsive UIJSSAxiosWordpressTwitter APIInstagram APIFacebook APIYouTube APIGoogle Tag Manager

My responsibilities

Website (front-end)

Educational platform: An educational platform where professors can upload and schedule lectures to different classes, automatically create and share Zoom meeting links after a lecture have been seen by all the students to discuss it, create assignments, quizzes and grade students. We built two mobile apps for Android and iOS, an admin dashboard where professors can manage lectures, send emails with grades to students' parents.

Achievements

- Created a Zoom integration that automatically creates a meeting link for each lecture and sends it to the students' emails
- Built an admin dashboard where professors can manage lectures, send emails with grades to students' parents.
- Created a library for creating and managing quizzes with multiple choice, true/false and fill-in-the-blank questions

Technologies used

FirebaseExpress.jsTypeScriptSendgridReactMaterial UIJSSFormikYupAxios

My responsibilities

Back-end (Firebase)Admin Dashboard (front-end)

Full-stack Web Developer

May 2018 - May 2020

Haya Solutions Inc.

Projects:

Netjeek: Built an eCommerce trans-shipping system designed to facilitate the purchase and delivery of goods to countries where customers can't place an order to international e-retailers directly.

Achievements

- Built an integration with Google maps where the user can pinpoint their delivery location on the map with automatic location detection
- Built an integration with Stripe for the users to pay for shipments
- Built the front-end app
- Did a system analysis defining APIs with all the possible responses
- Created a mock API with example responses for each end point, with a configurable front end to change between possible status codes

SKILLS & TOOLS

LANGUAGES

English (Fluent)
Arabic (Native)

EDUCATION

Bachelor's Degree of Computer Science and Automatic Control

Faculty of Engineering - Tanta University
2014 - 2019

GRADUATION PROJECT

An Express-like C++ web application framework

A simple-to-use web development framework with an easy syntax inspired by Express.js that lets developers build full-fledged back-end multi-threaded API servers and connect it to the desired database in C++ that also supports middleware.

C++17CGIApacheMultithreadingLinux

SELF-TAUGHT COURSES

Mastering React (by Mosh Hamedani)
Node.js - The Complete Guide to Build RESTful APIs (by Mosh Hamedani)
Vue - The Complete Guide (w/ Router, Vuex, Composition API) (by Maximilian Schwarzmüller)
CSS - The Complete Guide (by Maximilian Schwarzmüller)
Master C++ and OOP (Learncpp.com)
Introduction to Game Development Specialization (Coursera)
