

Dear Hiring Manager at **Discord**,

I am writing to express my interest in the **Front-end Developer** role. With 5 years of experience in web development, I am confident that I have the skills and qualifications necessary to excel in this position.

I have a strong background in **React**, **JavaScript**, and **HTML/CSS**. I also have experience with mobile-first design, SEO, accessibility and web development fundamentals. On the back end, I have experience with Express.js, Firebase and AWS.

During my time working as a senior front-end developer for Calqulate, I led a team of four front-end developers reviewing PRs and optimizing **code performance**. I developed front-end monorepo architecture with two apps and five independent libraries including a proprietary charts library using D3.js, tables and reusable UI components. I also developed a proprietary types SDK for API type safety.

I am excited about the opportunity to bring my skills and experience to your company and contribute to the continued success of your web development team.

Here is [my portfolio](#)

Sincerely,

Ahmed Habeila
