Dear Hiring Manager,

I am writing to express my interest in the **Front-end Developer** position. I have over 5 years of experience in building elegant and performant user interfaces using various technologies such as **React**, **JavaScript**, and **HTML/CSS**. I'm experienced in working collaboratively with others, performing code reviews and effective communication with clients.

Here's why I think I'm the perfect fit for this job
- During my time at Calqulate, I mentored a team of 4 front-end developers, performing PR reviews for code quality and enforcing best practices.
- I have extensive experience with multiple React state management tools including Redux, Redux-toolkit, and MobX.
- I also have experience writing unit tests with Jest and React testing library.
- I worked for fintech companies Calqulate (financial tool) and Quint (crypto currency).
- I'm skilled in Next.js and other SSR technologies such as Gatsby.js and Astro.
- I'm familiar with agile environments, JIRA and daily scrum meetings.
- I have experience with monorepos: Lerna, Yarn workspaces and Turborepo.
- I know Material UI by heart, with 4 years of experience working solely with this UI framework on multiple projects.

In my previous roles, I have successfully delivered several web-based projects for different clients and industries. Some of my notable achievements include:
- Collaborating with a team of 4 to launch 2 accessible, responsive websites with light/dark themes in 1 week, achieving a 100% Lighthouse score with optimized SEO and accessibility.
- Creating UI component library following a design system and documenting it on Storybook.
- Communicated with clients to develop and document website requirements in an agile environment.
- Leading a team of 4 front-end developers in developing a front-end monorepo architecture with 2 apps and 5 independent libraries for Calqulate.
- Enhancing developer experience by developing a proprietary types SDK for API type safety in TypeScript.
- Launching 2 responsive, accessible SEO-focused websites for BMW Foundation and TwentyThirty, increasing the reach to thousands of organic monthly users.
- Building back-end API with Express.js and Firebase for authentication, file uploads, and emails for an educational platform.
- Conducting system analysis, designing and implementing eCommerce website.

I am interested in working for your company because I believe I can contribute to your vision of creating innovative and user-friendly web solutions. I value collaboration, growth and innovation, and I am eager to learn from your talented team and apply my skills and knowledge to your projects.

Thank you for considering my application. I would love to discuss this opportunity further with you and answer any questions you may have.

Sincerely,
Ahmed Habeila
