PROFESSIONAL SUMMARY

- 8+ years of building and scaling frontend architecture and design systems
- Excellent background in **React**, **TypeScript**, and **HTML/CSS** with high adaptability to work with any stack
- Collaborative and friendly, with experience in leading teams

WORK EXPERIENCE

Frontend Architect at [Thomson Reuters](#)

July 2023 - Present

[Saffron design system](#)

- Scaled adoption to **1000+** engineers across **250+** repositories, reaching **2.8 million** internal downloads and **87%** adoption rate within 3 years
- Built TypeScript parser extracting component metadata to auto-generate documentation, reducing maintenance overhead by **80%** and removing human error
- Created **GPT-4** powered chatbot using generated component metadata, reducing developer support requests by **40%**
- Built pAlella: a Figma-to-code workflow generating code in any framework (React, Angular, vanilla), achieving up to **64.2%** in time savings and winning the **ZeroHeight award** for design system innovation in 2025
- Built Aioli, an AI-powered CLI tool that employs AI agent swarms to automatically detect, triage, and **remediate accessibility violations** and tech debt faster
- Owned technical architecture including monorepo structure, bundling, build/release processes, GitHub Actions, and 3rd party integrations
- Distilled requirements from UX designers, engineers, product team, testers and accessibility specialists into specification documents helping deliver **100+ components**
- Led team of **10** engineers, providing technical guidance and acting as subject matter expert, architecture reviewer, and sign-off authority on proposed changes
- Developed proprietary solutions for handling multiple web component versions in **micro-frontend** architectures using namespaces and scoped registries
- Added **IntelliSense** support to components using Custom Elements Manifest accross non-React frameworks, enabling autocomplete for attributes and CSS custom properties

Web Components **TypeScript** **React** **Angular** **Storybook** **Rollup** **Generative AI** **Playwright** **Chromatic**

Front-end Developer (Self-employed)

January 2023 - May 2023

[Quint Staking Web App](#)

- Built fully accessible, responsive website with light/dark themes
- Created UI component library following a design system and documented it on Storybook

React **Next.js** **TypeScript** **Radix UI** **Tailwind CSS** **Web 3** **Storybook** **AWS Amplify** **GitLab**

Front-end Developer at Calqulate Metrics

November 2020 - January 2023

[Calqulate](#)

- Communicated with clients to develop and document website requirements in an agile environment
- Led a team of 4 front-end developers in developing a front-end monorepo architecture with 2 apps and 5 independent libraries
- Developed libraries for charts in D3, tables in Devexpress, and reusable UI and form components in Material UI
- Enhanced developer experience by developing a proprietary types SDK for API type safety in TypeScript

React **TypeScript** **Material UI** **Turborepo** **Sentry** **AWS** **D3.js** **Devexpress** **Storybook** **Hasura** **Stripe API** **GraphQL**

Full-stack Developer at [Coformatique](#)

May 2020 - November 2020

[BMW Foundation](#)

- Built a fully responsive and fully accessible website that supports keyboard navigation and screen readers
- Created an accessibility menu which features high contrast mode, dyslexia-friendly font and animations toggle
- Integrated Google Tag Manager along with following the best SEO practices

React **Gatsby.js** **TypeScript** **Material UI** **JSS** **Multi-language Routing** **Responsive UI** **i18next** **Wordpress** **Twitter API** **Google Tag Manager** **Instagram API** **Facebook API** **YouTube API**

[TwentyThirty](#)

- Built a fully responsive and fully accessible website that supports keyboard navigation and screen readers
- Integrated Google Tag Manager along with following the best SEO practices

Gatsby.js **TypeScript** **Material UI** **JSS** **Multi-language Routing** **i18next** **Wordpress** **Twitter API** **Instagram API** **Facebook API** **YouTube API** **Google Tag Manager**

Educational platform

- Built back-end API with Express.js and Firebase for authentication, file uploads, emails, and database queries
- Integrated Zoom for automatic meeting link creation and email sending to students
- Built admin dashboard for lecture management and grade emailing to parents

Firebase **Express.js** **TypeScript** **Sendgrid** **React** **JSS** **Zoom API**

Full-stack Developer at [Haya Solutions Inc.](#)

May 2019 - May 2020

Netjeek

- Conducted system analysis to define APIs with possible responses
- Designed and implemented eCommerce website in React for international customers
- Documented codebase using JSDoc and written comprehensive unit tests using Jest and React testing library
- Integrated Google Maps for delivery location pinpointing and detection
- Created mock API in Python Django with a configurable front end for each endpoint status code

React **JavaScript** **Redux** **Python** **Django** **MongoDB** **Stripe API** **Google Maps** **React Testing Library**

PUBLICATIONS

[Principles of UX/UI Design by Meta](#)

EDUCATION

Bachelor's Degree of Computer Science and Automatic Control – (2014 - 2019)

Graduation Project: [An Express-like C++ web application framework](#)

A simple-to-use web development framework with an easy syntax inspired by Express.js that lets developers build full-fledged back-end multi-threaded API servers with middleware support and connect it to the desired database in C++

C++17 **CGI** **Apache** **Multithreading** **Linux**
