PROFESSIONAL SUMMARY

- 8+ years of building and scaling frontend architecture and design systems
- Excellent background in **React**, **TypeScript**, and **Python** with high adaptability to work with any stack
- Collaborative and friendly, with experience in leading teams

WORK EXPERIENCE

Full-stack Developer at [Thomson Reuters](#)

July 2023 - Present

Saffron design system

- Scaled adoption to **1000+** engineers across **250+** repositories, reaching **2.8 million** internal downloads and **87%** adoption rate within 3 years
- Built TypeScript parser extracting component metadata to auto-generate documentation, reducing maintenance overhead by **80%** and removing human error
- Created **GPT-4** powered chatbot using generated component metadata, reducing developer support requests by **40%**
- Built pAlella: a Figma-to-code workflow generating code in any framework (React, Angular, vanilla), achieving up to **64.2%** in time savings and winning the **ZeroHeight award** for design system innovation in 2025
- Built Aioli, an AI-powered CLI tool that employs AI agent swarms to automatically detect, triage, and **remediate accessibility violations** and tech debt faster
- Owned technical architecture including monorepo structure, bundling, build/release processes, GitHub Actions, and 3rd party integrations
- Distilled requirements from UX designers, engineers, product team, testers and accessibility specialists into specification documents helping deliver **100+ components**
- Led team of **10** engineers, providing technical guidance and acting as subject matter expert, architecture reviewer, and sign-off authority on proposed changes
- Developed proprietary solutions for handling multiple web component versions in **micro-frontend** architectures using namespaces and scoped registries
- Added **IntelliSense** support to components using Custom Elements Manifest accross non-React frameworks, enabling autocomplete for attributes and CSS custom properties

Web Components **TypeScript** **React** **Angular** **Storybook** **Rollup** **Generative AI** **Playwright** **Chromatic**

Full-stack Developer at Calqulate Metrics

November 2020 - January 2023

Calqulate

- Communicated with clients to develop and document website requirements in an agile environment
- Led a team of 4 front-end developers in developing a front-end monorepo architecture with 2 apps and 5 independent libraries
- Developed libraries for charts in D3, tables in Devexpress, and reusable UI and form components in Material UI
- Enhanced developer experience by developing a proprietary types SDK for API type safety in TypeScript

React **TypeScript** **Turborepo** **Sentry** **AWS** **D3.js** **Devexpress** **Storybook** **Hasura** **Stripe API** **GraphQL**

Full work experience since **May 2019** is available on [my portfolio](#).

PUBLICATIONS

Versioned web components and micro front-ends – June 2025
